

MODEL 5073REMLYNX Remote Windows Software

General Description

The Model 5073REMLYNX Remote Windows Software allows portable computers, home computers, and office workstations to access NovaStar data using dial-up or direct connect telephone or network lines.

REMLYNX lets you build a directory of telephone numbers and network addresses to connect to NovaStar systems. Connect by dialing directly into the NovaStar system, into your office VPN or connect over the Internet.

REMLYNX will display text and NovaStar 4 style graphic images on your MS Windows computer. To display NovaStar 4X style graphics use Model 5073REMX Remote X-Windows Software.

REMLYNX runs under MS Windows. A copy (license) of REMLYNX is required for each computer that REMLYNX is installed on. For organizations having many REMLYNX users, HydroLynx allows you to purchase a site license that is good for up to 20 users.
