

MODEL 5073REMX Remote X-Windows Software

General Description

Windows workstations can be used to access NovaStar 4X style graphics through a network connection. The same NovaStar 4X graphics screens that are displayed on the computer console can be displayed on the Windows workstation in a single full screen window.

REMX runs under MS Windows. A copy (license) of REMX is required for each computer that REMX is installed on. For organizations having many REMX users, HydroLynx allows you to purchase a site license that is good for up to 20 users.
